Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The application is a 371 of PCT/EP98/03468, filed November 29, 1999. The preliminary amendment filed on November 29, 1999 has been entered. Claims 3-7, 9, 12 and 13 were amended as requested.

Election/Restriction

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I: claims 1-5, 7, 10, 11 and 13 drawn to catalytically active subunit of human telomerase, its encoding DNA, expression vector and a host cell for recombinant method of production said unit.

Group II: claims 6 and 8 drawn to antibodies against catalytically active subunit of human telomerase and a method of using said antibodies for diagnosis.

Group III: claim 9 directed to a method of using antibodies for preparing medicaments.

Group IV: claim 12 directed to a screening assay for identifying modulators of human telomerase.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical features of Group I is the catalytically active subunit of human telomerase; the special technical feature of Group II is the antibody against the catalytically active subunit of human telomerase. Thus, technical features of Group I and II are different. The technical feature of group Group III is the same as technical feature of Group II, but 37 CFR 1.475 does not provide for multiple products or methods within single application, therefore, unity of invention is lacking with regard to Group II and III. The technical feature of group IV is unknown. For the mentioned reasons restriction between Groups I-IV is proper.
